

THE REASON WHY GRIBBIN JOHN

[the reason why the miracle of life on earth by john gribbin](#)

Gribbin has said some phenomenally stupid things in past books, but he's really outdone himself in this one. The Reason Why starts from a dubious premise "Earth is uniquely suited to life" and throws both legitimate science terribly abused and outright, borderline innumerate bullshit at the reader for two hundred pages in the hope that any of it stick.

John Gribbin is here to persuade us that it does. In this ground-breaking and provocative new book Gribbin argues that we owe our existence to the impact of a 'supercomet' with Venus 600 million years ago. But this is only part of the story, just one of the astronomical and geophysical reasons why the Earth is special.
